Outpatient Mental Health Service Performance Indicators

Executive Summary

The Department of Health– Abu Dhabi (DOH) is the regulatory body of the healthcare sector in the Emirate of Abu Dhabi and ensures excellence in healthcare for the community by monitoring the health status of its population.

The Emirate of Abu Dhabi is experiencing a substantial growth in the number of hospitals, centers and clinics. This is ranging from school clinics and mobile units to internationally renowned specialist and tertiary academic centers. Although, access and quality of care has improved dramatically over the last couple of decades, mirroring the economic upturn and population boom of the Abu Dhabi Emirate, however challenges remain in addressing further improvements.

The main challenges that are presented with increasingly dynamic population include an aging population with increased expectation for treatment, utilization of technology and diverse workforce leading to increased complexity of healthcare provision in Abu Dhabi. All of this results in an increased and inherent risk to quality and patient safety.

DOH has developed dynamic and comprehensive quality framework in order to bring about improvements across the health sector. This guidance pertains to the quality indicators that the Department of Health (DOH) is requiring for quarterly reporting by healthcare facilities operating outpatient mental health services in Abu Dhabi.

The guidance sets out the full definition and method of calculation for patient safety and clinical effectiveness indicators. For enquiries about this guidance, please contact jawda@doh.gov.ae

This document is subject for review and therefore it is advisable to always utilize online versions available on the DOH website.

Version 2: November 2025

Effective From: Version 2, Q1 2026

About this Guidance

The guidance sets out the definitions and reporting frequency of JAWDA mental health performance indicators. Department of Health (DoH) with consultation of local and international Outpatient Mental Health treatment quality of care expertise developed mental health performance indicators that are aimed for assessing the degree to which a provider competently and safely delivers the appropriate clinical services to the patient within the optimal time period.

The Jawda KPI for Outpatient Mental Health in this guidance include measures to monitor i.e. how well Outpatient Mental Health service providers care for their patients, how often they follow best practices and how effective they are at treating their patients. Healthcare providers are the most qualified professionals to develop and evaluate quality of care for the patients; therefore, it is crucial that clinicians retain a leadership position in defining performance among Outpatient Mental Health service providers.

Who is this guidance for?

All DoH licensed healthcare facilities providing Outpatient Mental Health treatment in the Emirate of Abu Dhabi, with at least a Psychiatrist Specialist/Consultant.

How do I follow this guidance?

Each provider will nominate one member of staff to coordinate, collect, monitor and report mental health quality performance indicators data as per communicated dates. The nominated healthcare facility lead must in the first instance e-mail their contact details (if different from previous submission) to jawda@doh.gov.ae and submit the required quarterly quality performance indicators through Jawda online portal.

What are the Regulation related to this guidance?

- Legislation establishing the Health Sector
- DOH Standard for Mental Health Services and Treatment
- As per DoH Policy for Quality and Patient Safety issued January 15th 2017, this guidance applies to all DOH Licensed Hospital Healthcare Facilities in the Emirate of Abu Dhabi in accordance with the requirements set out in this Standard.

Outpatient Mental Health Service Performance Indicators

Type: OMH Quality Indicator

Number: OMH001

KPI Description (title):	Percentage of Patients on Antipsychotic Medication(s) Who Had Complete Routine Investigation and ECG ordered within 12 months prior to prescription
Domain	Safety
Indicator Type	Process
Definition:	Percentage of outpatients (all ages) on antipsychotic medication(s) who had ECG and other Investigations ordered within 12 months prior to prescription.
Calculation:	<p>Numerator: Number of patients on antipsychotic medication(s) who have completed all investigations mentioned below, ordered in any setting (e.g. OP or IP), within 12 months prior to the initial antipsychotic prescription or refill in the reporting quarter.</p> <p>Complete Investigations:</p> <ul style="list-style-type: none"> • Electrocardiogram (ECG) • Full blood count • Hemoglobin A1c • Lipid profile (Total Chol, LDL, HDL, Triglycerides) • Liver function test (ALT and AST) • Urea and electrolytes (Sodium, potassium, creatinine) <p><i>Numerator Guidance: Patients with any of the missing investigations mentioned above will NOT be counted in the numerator.</i></p> <p>Denominator: Total number of outpatients (all ages) who are prescribed with antipsychotic medications, (See Appendix B) that were visited during the reporting period.</p> <p>Denominator Guidance</p> <ul style="list-style-type: none"> ○ Visits can be face-to-face or virtual consultations ○ Visits will be under Psychiatrist Specialist/Consultant
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International Comparison if available	Developed locally by modifying similar indicators used by The NICE guidelines, Australian and New Zealand college. Recommendations Psychosis and schizophrenia in adults: prevention and management Guidance NICE standards for antipsychotic treatment and monitoring 2.0.pdf Guidelines versus practice in screening and monitoring of cardiometabolic risks in patients taking antipsychotic medications: where do we stand?
Desired direction & Target:	Higher the better: ≥90%
Notes for all providers

Outpatient Mental Health Service Performance Indicators

Type: OMH Quality Indicator

Number: OMH003

KPI Description (title):	Percentage of Patients Who Were Concurrently Prescribed Two or More Different Benzodiazepines
Domain	Safety
Indicator Type	Process
Definition:	Percentage of patients (all ages) who were concurrently prescribed two or more different benzodiazepines medications (at the same time).
Calculation:	<p><u>Numerator:</u> Number of patients on benzodiazepine medication(s) who were concurrently prescribed two or more benzodiazepines during the reporting quarter.</p> <p><u>Numerator Guidance:</u> Take the highest count of medications in each reporting quarter i.e. anytime the patient qualifies for the numerator</p> <p><u>Denominator:</u> Total number of outpatients (all ages) who are prescribed with one or more benzodiazepines, that visited during the reporting period.</p> <p><u>Denominator Guidance:</u></p> <ul style="list-style-type: none"> ○ <i>Visits can be face-to-face or virtual consultations</i> ○ <i>Visits will be under Psychiatrist Specialist/Consultant</i>
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International Comparison if available	Developed locally by modifying similar indicators used by royal Australian and New Zealand college of psychiatrists

Outpatient Mental Health Service Performance Indicators

Type: OMH Quality Indicator

Number: OMH004

KPI Description (title):	Percentage of Patients Receiving Psychotherapy Who Achieved a Reduction in Depression Severity
Domain	Effectiveness
Indicator Type	Outcome
Definition:	Percentage of patients (adults) receiving psychotherapy who achieved a reduction in depression severity measured by PHQ-9 within 6 months after initiation of psychotherapy.
Calculation:	<p><u>Numerator:</u> Number of patients (adults) achieving a reduction in depression severity measured by PHQ-9 within 6 months after initiation of psychotherapy.</p> <p><u>Denominator:</u> Total number of new outpatients (adults) with <i>primary or secondary</i> diagnosis of depression who had PHQ-9 done before initiating psychotherapy AND completed 6 months of psychotherapy, before the visit during the reporting quarter.</p> <p><u>Denominator Guidance:</u></p> <ul style="list-style-type: none"> ○ <i>Include patients who completed a recommended course of psychotherapy for less than 6 months.</i> ○ <i>Include patients who are on current psychotherapy course that reached the 6-month duration.</i> ○ <i>Sessions can be face-to-face or virtual</i> ○ <i>Psychotherapy sessions done by Psychologists</i> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> ● Patients refusing to complete or comply with the recommended treatment
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International Comparison if available	American Psychology Association
Desired direction & Target:	Higher the better
Notes for all providers	
Data sources and guidance:	<ul style="list-style-type: none"> ● Hospital patient data source ● Patient's records (Malaffi data extraction)

Outpatient Mental Health Service Performance Indicators

Type: OMH Quality Indicator

Number: OMH005

KPI Description (title):	Percentage of Patients Receiving Psychotherapy Who Achieved a Reduction in Anxiety Severity
Domain	Effectiveness
Indicator Type	Outcome
Definition:	Percentage of patients (adults) receiving psychotherapy who achieved a reduction in anxiety severity measured by GAD-7 within 6 months after initiation of psychotherapy.
Calculation:	<p><u>Numerator:</u> Number of patients (adults) achieving a reduction in anxiety severity measured by GAD-7 within 6 months after initiation of psychotherapy.</p> <p><u>Denominator:</u> Total number of new outpatients (adults) with <i>primary or secondary</i> diagnosis of Anxiety who had GAD-7 done before initiating psychotherapy AND completed 6 months of psychotherapy before the visit during the reporting quarter.</p> <p><u>Denominator Guidance:</u></p> <ul style="list-style-type: none"> ○ <i>Include patients who completed a recommended course of psychotherapy for less than 6 months.</i> ○ <i>Include patients who are on current psychotherapy course that reached the 6-month duration.</i> ○ <i>Sessions can be face-to-face or virtual</i> ○ <i>Psychotherapy sessions done by Psychologists</i> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> ● Patients refusing to complete or comply with the recommended treatment

Outpatient Mental Health Service Performance Indicators

Type: OMH Quality Indicator

Number: OMH006

KPI Description (title):	Percentage of First Available Appointment for Patients Referred for Mental Health Services
Domain	Timeliness
Indicator Type	Process
Definition:	Time for a Department of Health (DOH) licensed relevant mental healthcare professionals to see patients referred for mental health services from the time of receiving the referral.
Calculation:	<p>Numerator: Number of patients in the denominator population that were seen by the relevant (DOH) licensed mental health professional within 10 working days from receiving the referral (or self-requested appointment).</p> <p>Numerator Guidance:</p> <ul style="list-style-type: none"> ○ <i>Visits can be face-to-face or virtual consultations</i> <p>Denominator: Total number of all appointment's referral (including self-referral) to (DOH) licensed mental health professional within the reporting quarter.</p> <p>Report Separately appointment for:</p> <ol style="list-style-type: none"> a) <i>DOH licensed Psychologists</i> b) <i>DOH licensed Psychiatrists</i> <p>Denominator Guidance:</p> <ul style="list-style-type: none"> ● <i>Suspected / Confirmed with new appointment request/complaint of any mental health concern in that facility</i> <p>Denominator Exclusions:</p> <ul style="list-style-type: none"> ● Non-Physician Led Appointment Types (e.g. refill, diagnostics) <i>except for Psychologist led appointments</i> ● Follow Up Appointment Types ● Patient choice of not having the appointment within 10 working days when offered ● Walk in Patients without prior appointment or patients having the same day scheduled appointment ● No show or appointments cancelled by patients. ● Patients who left without being seen
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International Comparison if available	American Psychology Association
Desired direction & Target:	Higher the better: ≥90% within 10 days

Notes for all providers
