Executive Summary

The Department of Health– Abu Dhabi (DOH) is the regulatory body of the healthcare sector in the Emirate of Abu Dhabi and ensures excellence in healthcare for the community by monitoring the health status of its population.

The Emirate of Abu Dhabi is experiencing a substantial growth in the number of hospitals, centers and clinics. This is ranging from school clinics and mobile units to internationally renowned specialist and tertiary academic centers. Although, access and quality of care has improved dramatically over the last couple of decades, mirroring the economic upturn and population boom of the Abu Dhabi Emirate, however challenges remain in addressing further improvements.

The main challenges that are presented with increasingly dynamic population include an aging population with increased expectation for treatment, utilization of technology and diverse workforce leading to increased complexity of healthcare provision in Abu Dhabi. All of this results in an increased and inherent risk to quality and patient safety.

DOH has developed dynamic and comprehensive quality framework in order to bring about improvements across the health sector. This guidance relates to the quality indicators that DOH is mandating the quarterly reporting against by the operating general and specialist hospitals in Abu Dhabi.

The guidance sets out the full definition and method of calculation for patient safety and clinical effectiveness indicators. For enquiries about this guidance, please contact jawda@doh.gov.ae

This document is subject for review and therefore it is advisable to utilize online versions available on the DOH website at all times.

About this Guidance

The guidance sets out the definitions and reporting frequency of JAWDA mental health performance indicators. Department of Health (DoH) with consultation of local and international Mental Health treatment quality of care expertise developed mental health performance indicators that are aimed for assessing the degree to which a provider competently and safely delivers the appropriate clinical services to the patient within the optimal time period.

The mental health performance indicators in this guidance include measures to monitor clinical effectiveness, and outcomes among patients with mental health i.e., (readmission, ... Healthcare providers are the most qualified professionals to develop and evaluate quality of care measures for Mental Health treatment. Therefore, it is crucial that clinicians retain a leadership position in defining mental health quality of care.

Who is this guidance for?

All DoH licensed healthcare facilities providing mental health treatment in the Emirate of Abu Dhabi.

How do I follow this guidance?

Each provider will nominate one member of staff to coordinate, collect, monitor and report mental health quality performance indicators data as per communicated dates. The nominated healthcare facility lead must in the first instance e-mail their contact details (if different from previous submission) to jawda@doh.gov.ae and submit the required quarterly quality performance indicators through Jawda online portal.

What are the Regulation related to this guidance?

- Legislation establishing the Health Sector
- DOH Standard for Mental Health Services and Treatment
- As per DoH Policy for Quality and Patient Safety issued January 15th 2017, this guidance applies to all DOH Licensed Hospital Healthcare Facilities in the Emirate of Abu Dhabi in accordance with the requirements set out in this Standard.

Glossary

INPATIENT: *Is a beneficiary registered and admitted to a hospital for bed occupancy for purposes of receiving healthcare services and is medically expected to remain confined overnight and for a period in excess of 12 consecutive hours.*

- *Daycase admission is not included in INPATIENT.*
- *Beds **excluded** from the inpatient bed complement:*
 - ***Beds/cots for healthy newborns***
 - *Beds in Day Care units, such as surgical, medical, pediatric day care, interventional radiology*
 - *Beds in Dialysis units*
 - *Beds in Labor Suites (e.g. birthday beds, birthing chairs)*
 - *Beds in Operating Theatre*
 - *Temporary beds such as stretchers*
 - *Chairs, Cots or Beds used to accommodate sitters, parents, guardians accompanying patients or sick children and healthy baby accompanying a hospitalized breast-feeding mother*
 - *Beds closed during renovation of patient care areas when approved by the competent authority*

DAYCASE: *Daycase beds, also known as observation beds, are beds used in Day Care units such as surgical, medical, pediatric day care interventional radiology. They are not included in the inpatient bed complement.*

LONG TERM CARE PATIENTS: *They will be reported under LTCF Jawda Guidance.*

Service codes (not limited to): *17-13, 17-14, 17-15, 17-16, 17-27, 17-28, 17-30, 17-31, self-pay LTC, etc.*

CRITICAL CARE AREA: *A patient is in a Critical Care Area if they are receiving active cardiac monitoring (including telemetry) in an Intensive Care Unit, Emergency Room, Urgent Care Centre, Operating Room, Procedure Room, Anesthetic Induction Room or Recovery Area.*

Mental Health Service Performance Indicators

MH Performance Indicators

Type: MH Quality Indicator

Number: MH001

KPI Description (title):	Unplanned Readmissions for Mental Health Disorders
Domain	Effectiveness
Indicator Type	Outcome
Definition:	Percentage of psychiatric (mental health or addiction) discharges that are followed within 28 days by another mental health or addiction hospital admission.
Calculation:	<p><u>Numerator:</u> Total number of inpatients (all ages) who had another admission to the same or another mental health facility within 28 days from index discharge.</p> <p><u>Numerator Exclusion:</u> If a patient has more than one readmission within 28 days of discharge from the index admission, only the first is considered as readmission</p> <p><u>Denominator:</u> Total number of inpatients (all ages) who were discharged from mental health facility or addiction as a principal diagnosis during the reporting period.</p> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> • Discharged against medical advice • Patients transferred to another acute inpatient hospital or psychiatric inpatient hospital • Police Cases • Readmissions within 28 days from the index discharge <p>Calculation: Numerator/denominator *100</p>
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International comparison if available	Australian Institute for Health and Welfare Mental health services in Australia, Summary of Key Performance Indicators - Australian Institute of Health and Welfare (aihw.gov.au)
Desired direction:	Lower is better
Notes for all facilities	
Data Source/ Report Name:	Patient medical records

Mental Health Service Performance Indicators

Type: MH Quality Indicator

Number: MH002

KPI Description (title):	Mortality Rate Within 30 Days After Discharge.
Domain	Effectiveness
Indicator Type	Outcome
Definition:	Percentage of adult inpatients who died, from any cause, within 30 days of discharge from mental health facility
Calculation:	<p><u>Numerator:</u> Patients that died, from any cause, within 30-days of mental health facility discharge.</p> <p><u>Denominator:</u> Total number of adult inpatients (≥ 18 years) who were discharged after a mental care/ addiction (primary diagnosis) inpatient admission during the reporting period. (If a patient has more than one admission in the reporting quarter, only include the last discharge encounter.)</p> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> • Discharged against medical advice • Patients transferred to another acute or psychiatric inpatient hospital. • Police Cases <p>Calculation; Numerator/denominator *100</p>
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International comparison if available	<p>CMS</p> <p>https://www.cms.gov/files/document/draft-specification-30-day-risk-standardized-all-cause-mortality-following-ipf-discharge-measure.pdf</p>
Desired direction:	Lower is better
Notes for all facilities	
Data Source/ Report Name:	Patient medical records

Mental Health Service Performance Indicators

Type: MH Quality Indicator

Number: MH003

KPI Description (title):	Follow-Up Appointment After Inpatient Hospitalization for Mental Health Disorders
Domain	Patient-centeredness
Indicator Type	Process
Definition:	The percentage of discharged inpatients after inpatient psychiatric hospitalization, who were offered a follow-up appointment with a mental health practitioner within 9 days of discharge.
Calculation:	<p><u>Numerator 1:</u> Number of discharges for inpatients (all ages) who were hospitalized for treatment of mental health or addiction as a principal diagnosis and who had a follow-up appointment with a mental health practitioner within 9 days of discharge.</p> <p><u>Denominator 1:</u> Total number of inpatients (all ages) who were discharged from mental health facility or addiction as a principal diagnosis during the reporting period.</p> <p>Guidance: Patients getting discharged from inpatient psychiatric facility to PAR \ Acute care setting in the same facility are included in the discharged population</p> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> • Discharged against medical advice • Patients transferred to another acute or psychiatric inpatient hospital • Patient refuses to follow up in the same facility • Repatriated, discharged directly to airport. • Discharged Police Cases who follow up with a psychiatrist in the prison • Patients who are not eligible for ABM coverage or insurance coverage. • Patients who choose to wait longer than 9 days for their follow up appointment • Patients referred for Home Mental health Services <p>Calculation: Numerator/denominator *100</p>
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International comparison if available	Australian Institute for Health and Welfare
Desired direction:	High is better
Notes for all facilities	
Data Source/ Report Name:	- Patient medical records

Mental Health Service Performance Indicators

Type: MH Quality Indicator

Number: MH004

KPI Description (title):	Follow-Up visit After inpatient Hospitalization for mental health disorders
Domain	Patient-centeredness
Indicator Type	Process
Definition:	The percentage of discharged inpatients after inpatient psychiatric hospitalizations who are seen by mental health practitioners within 9 days after discharge (physically or virtually).
Calculation:	<p><u>Numerator 2:</u> Number of discharged patients after inpatients psychiatric hospitalization who are seen by mental health practitioners within 9 days after discharge (physically or virtually)</p> <p><u>Denominator 2:</u> Total Number of discharges for inpatients (all ages) who were hospitalized for treatment of mental health or addiction as a principal diagnosis and who had a follow-up appointment with a mental health practitioner within 9 days of discharge.</p> <p>Guidance: Patients getting discharged from inpatient psychiatric facility to PAR \ Acute care setting in the same facility are included in the discharged population</p> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> • Discharged against medical advice • Patients transferred to another acute inpatient or psychiatric inpatient hospital • Patient refuses to follow up in the same facility • Repatriated, discharged directly to airport. • Discharged Police Cases who follow up with a psychiatrist in the prison • Patients who are not eligible for ABM coverage or insurance coverage • Patients who choose to wait longer than 9 days for their follow up appointment • Patients referred for Home Mental health Services <p>Calculation: Numerator/denominator *100</p>
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage
International comparison if available	Australian Institute for Health and Welfare
Desired direction:	High is better
Notes for all facilities	
Data Source/ Report Name:	- Patient medical records

Mental Health Service Performance Indicators

Type: MH Quality Indicator

Number: MH005

KPI Description (title):	Rate of Inpatient Falls Resulting in Any Injury Per 1,000 Mental Health Disorder Inpatient Days
Domain	Safety
Indicator Type	Outcome
Definition:	Rate of mental health and addiction inpatient falls resulting in any injury per 1000 mental health and addiction inpatient days.
Calculation:	<p><u>Numerator:</u> Total number of mental health and addiction inpatient falls resulting in injury (minor, moderate, major, or death) to the patient in the measurement quarter</p> <p><u>Numerator Inclusions:</u> Mental health and addiction Inpatients in a mental health facility falls: minor, moderate, major, or death. A fall is an unplanned descent to the floor. Include falls when a patient lands on a surface where you wouldn't expect to find a patient. All unassisted and assisted falls are to be included whether they result from physiological reasons (fainting) or environmental reasons (slippery floor). Also report patients that roll off a low bed onto a mat as a fall. The National Database of Nursing Quality Indicators NDNQI definitions for injury follow:</p> <ul style="list-style-type: none"> •None -patient had no injuries (no signs or symptoms) resulting from the fall, if an x-ray, CT scan or other post fall evaluation results in a finding of no injury. •"Minor- resulted in application of a dressing, ice, cleaning of a wound, limb elevation, topical medication, bruise or abrasion. •Moderate-resulted in suturing, application of steri-strips/skin glue, splinting or muscle/joint strain. •Major- resulted in surgery, casting, traction, required consultation for neurological (basilar skull fracture, small subdural hematoma) or internal injury (rib fracture, small liver laceration) or patients with coagulopathy who receive blood products as a result of the fall. •Death-the patient died as a result of injuries sustained from the fall (not from physiologic events causing the fall)." <p><u>Numerator Exclusions:</u> Patient falls, but no harm was evident</p> <p><u>Denominator:</u> Total number of mental health and addiction inpatients days for the mental health facility during the reporting period.</p> <p><u>Denominator Exclusion:</u></p> <ul style="list-style-type: none"> • Healthy newborn (See glossary) • Specialized and Generalized hospitals • All Long-term care, home care and Post-acute Rehab patients

Mental Health Service Performance Indicators

	Rate: Calculation: [numerator / denominator] x 1000
Reporting Frequency:	Quarterly
Unit of Measure:	Rate per 1000 mental health and addiction inpatient days
International comparison if available	Developed locally by modifying similar indicators used by AHRQ, OECD and CQC following local discussion and taking local culture and setting into consideration.
Desired direction:	Lower is better

Data Source/ Report Name:	- Patient medical records

Type: MH Quality Indicator

Number: MH006

KPI Description (title):	Percentage of Patients with Completed Investigation Before Initiating the Lithium Therapy
Domain	Effectiveness
Indicator Type	Process
Definition:	The percentage of patients ≥ 18 years of age with confirmed completed investigations within 28 days. prior to commencing Lithium Treatment.
Calculation:	<p><u>Numerator:</u> Number of patients ≥ 18 years of age who completed their basic investigations within 28 days before commencing lithium treatment.</p> <p>Basic investigations:</p> <ul style="list-style-type: none"> • Cardiac function (ECG recommended in those with risk factors or existing problems) • Renal Function Tests (Urea, creatinine and eGFR) • Thyroid Function Tests • Calcium • Full blood count <p><u>Denominator:</u> Total number of patients commencing Lithium Treatment in the same reporting period</p> <p><u>Denominator Inclusion:</u></p> <ul style="list-style-type: none"> • Inpatient. • Outpatient <p><u>Denominator Exclusion:</u> Pregnancy confirmed by the lab.</p>
Reporting Frequency:	Quarterly
Unit of Measure:	Percentage

Mental Health Service Performance Indicators

Type: MH Quality Indicator

Number: MH008

KPI Description (title):	Rate of Seclusion
Domain	Effectiveness
Indicator Type	Process
Definition:	The number of seclusion events per 1,000 inpatient days within mental health facility
Calculation:	<p>Numerator: Count number of seclusion events occurring in mental health facility during the reporting period.</p> <p>Denominator: Total number of mental health inpatients' days for the same reporting period.</p> <p>Calculation: (Numerator ÷ Denominator) x 1,000</p>
Reporting Frequency:	Quarterly
Unit of Measure:	Rate per 1000 mental health inpatient days.
International comparison if available	<p>Australian institute of health and welfare</p> <p>https://www.aihw.gov.au/reports/mental-health-services/mental-health-services-in-australia/report-contents/mental-health-indicators/summary-of-key-performance-indicators</p>
