

Health Technology Review	
Technology Ref.:	HTA21032
Technology Name:	ActivGo
Approvals by International Bodies:	The Ministry of Food and Drug - Korea
Company name:	ProvenMed Global FZ-LLC
Agent in UAE:	Amine Staali
Email:	Amine.staali@provenmed.com

<b>Short Description of the Technology:</b>	ActivGo is a solution to manage urinary incontinence in males that is comfortable, affordable and hygienic. It is an innovative, user friendly, reusable and non-invasive external catheter kit that collects the urine of its wearer on the go in a bag strapped on the wearer's leg. The system allows male patients with urinary incontinence to practice their daily life in ease and comfort.

**Summary of Review:**

The company, ProvenMed, is one of the startup companies in the Healthtech Hub and HUB71. Their solution provides an innovative approach for male patients with urinary incontinence to practice their daily life in a more hygienic way.

Similar portable solutions could be found in the market; however, they don't offer the same quality and comfort that ActivGo does specially in Hygiene as ActivGo is the only product in this category that provides a portable washing solution for the genitals and the system to prevent bacterial growth and infections. The solution was registered in Korea and is currently covered by insurance there.

Advantages	Disadvantages
Comfortable	Availability of cheaper solutions
Ease of use	Currently built for male patients only
Hygienic	
Cost Effective	

We recommend an approval of using this technology with the following conditions:

1. Approve ActivGO to be used in Abu Dhabi.
2. Compliance with the conditions and regulations of the Department of Health regarding the products marketing and advertising in the health sector.
3. Compliance with the relevant laws and standards of the Department of Health.
4. Any other documents or information requested regarding the product.

Moreover, DOH has the right to stop the product at any stage if deemed necessary, initial Conditions and any subsequent conditions must be satisfied before obtaining final approval. Failure to do so will reflect in provoking the approval.
