

Health Technology Review

Technology Ref.:	HTA22046
Technology Name:	V-Veil UP 2
Approvals by International Bodies:	NA
Company name:	Health Pulse Drug Store
Agent in UAE:	Nayef AlMoosa
Email:	na3f@health1Zulse.ae

Short Description of the Technology:	The Vaginal Veil Collector "V-Veil UP2" is a class I non-sterile UVC disinfected medical device for human use used by patient itself or by doctor or nurse to collect secretions, various fluids and substances, which are in the vaginal cavity and cervix for the diagnosis by laboratory tests.
---	--

Health Technology Assessment Team Recommendation:	Disapprove
--	-------------------

Summary of Review:

The device is a tool kit for sample collection, it collects the fluids in the cervix cavity (the DNA and cells), its intended use for the detection of the HPV & STDs. The device as claimed it detects two times more than the standards swipe. The supporting evidence on the efficacy of this device is limited and a local study will be beneficial to determine the efficacy & cultural acceptance.

Advantages	Disadvantages
Device is CE marked & Manufacturer has ISO 13485 certification	Limited supportive evidence on the use of the device and the claim on the HPV detection two times more than the standard method.
Easy to use and helps in detecting HPV and STDs infections	More studies are required that evaluate a cross-cultural population
Device presents no risk for patient use	More evidence is required for the accuracy of this technology and cost effectiveness

We recommend a **Disapproval of using this technology** due to lack of evidence on the device efficacy & lack of multi-disciplinary studies.
